THE

AMERICAN JOURNAL OF SCIENCE.

EDITOR: EDWARD S. DANA.

ASSOCIATE EDITORS

PROFESSORS GEO. L. GOODALE, JOHN TROWBRIDGE, W. G. FARLOW AND WM. M. DAVIS, OF CAMBRIDGE,

PROFESSORS A. E. VERRILL, HENRY S. WILLIAMS AND L. V. PIRSSON, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA,
PROFESSOR JOSEPH S. AMES, OF BALTIMORE,
MR. J. S. DILLER, OF WASHINGTON.

FOURTH SERIES.

VOL. XIV—[WHOLE NUMBER, CLXIV.]

WITH NINE PLATES.

NEW HAVEN, CONNECTICUT.

1902.

THE TUTTLE, MOREHOUSE & TAYLOR COMPANY,
NEW HAVEN, CONN.

CONTENTS TO VOLUME XIV.

Number 79.

Page

ART I.—Spectra Arising from the Dissociation of Water Vapor, and the Presence of Dark Lines in these Spectra; by J. TROWBRIDGE. (With Plate I.) 1

II.—Occurrence of Greenockite on Calcite from Joplin, Missouri; by H. B. CORNWALL 7

III.—Quantitative Study of Variation in the Fossil Brachiopod Platystrophia lynx; by E. R. CUMINGS and A. V. MAUCK. (With Plates II–III.) 9

IV.—Studies of Eocene Mammalia in the Marsh Collection, Peabody Museum; by J. L. WORTMAN 17

V.—New Exposures of Eruptive Dikes in Syracuse, N. Y.; by P. F. SCHNEIDER 24

VI.—Petrography of Recently Discovered Dikes in Syracuse, N. Y; by C. H. SMYTH, Jr. 26

VII.—Preliminary Note on Silver Chabazite and Silver Analcite; by G. STEIGER 31

VIII.—Significance of Certain Cretaceous Outliers in the Klamath Region, California; by O. H. HERSHEY 33

IX.—Action of Copper Sulphate upon Iron Meteorites; by O. C. FARRINGTON 38

X.—Petrographical Contribution to the Geology of the Eastern Townships of Quebec; by J. A. DRESSER 43

XI.—Action of Carbon Dioxide on the Borates of Barium; by L. C. JONES 49

XII.—Studies in the Cyperaceæ; by T. HOLM. XVI 57

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Probable Source of the Heat of Chemical Combination, T. W. RICHARDS: Lithium Silicide, MOISSAN: Black Color of the Rocks in the Cataracts of the Nile, LORTET and HUGOUNENQ: Bismuth-lead Sulphide-halides, DUCATTE, 64.—Atomic Weight of Uranium, RICHARDS and MERIGOLD: Qualitative Chemistry, PRESCOTT and SULLIVAN: Qualitativen Analyse, W. BÖTTGER, 65.—Reflection Power of Metals for Ultra-violet and Ultra-red Rays, E. HAGEN and H. RUBENS, 66.—Spark Discharge from Metallic Poles in Water, WILSING: Electrical Effect of Light, P. LENARD: Interference Tubes for Electrical Waves, A. BECKER: Law of Velocity which Cathode Rays suffer by Reflection, E. GEHRCKE, 67.—Role of Self-Induction in discharges of Electricity through Gases, M. B. EGINITIS and M. A. DE GRAMONT: Theory of Optics, P. DRUDE, 68.—Elementary Principles in Statistical Mechanics, J. W. GIBBS: Beiträge zur chemischen Physiologie, F. HOFMEISTER, 69.

Geology and Natural History—U. S. Geological Survey: Minéralogie de la France, LACROIX: Size of Grain in Igneous Rocks, QUENEAU, 70.—Eparchæan Interval, LAWSON: Former Extent of the Newark System, HOBBS: Quaternary History of So. California, HERSHEY: Plissements et Dislocations de l'Écorce terrestre, NEGRIS, 71.—Tungsten Mine at Trumbull, Conn., HOBBS: Eruption of Mt. Pelee, VERRILL, 72.—Maldive and Laccadive Archipelagoes, GARDINER: Actinians of Porto Rico, DUERDEN: Ascidians of the Bermuda Islands, VAN NAME, 74.—Embryology of Terebratulina septentrionalis, CONKLIN: Yellow Fever investigations at Havana, GARGAS, 75.

Miscellaneous Scientific Intelligence—Smithsonian Institution: United States Weather Bureau, A. J. HENRY: Scientia: Ostwald's Klassiker, 76.

Number 80.

Page

ART. XIII.—Terraces of the Westfield River, Mass.; by W. M. DAVIS. (With Plate IV) 77

XIV.—Cretaceous Turtles, Toxochelys and Archelon, with a Classification of the Marine Testudinata; by G. R. WIELAND 95

XV.—Magnetic Effect of Electric Displacement; by J. B. WHITEHEAD, Jr. 109

XVI.—Certain Relations of Plant Growth to Ionization of the Soil; by A. B. PLOWMAN 129

XVII.—Demagnetizing Effects of Electromagnetically Compensated Alternating Currents; by Z. E. CROOK 133

XVIII.—Nepheline-Syenites and other Syenites near Port Coldwell, Ontario; by A. P. COLEMAN 147

XIX.—Double Ammonium Phosphates in Analysis; by M. AUSTIN 156

XX.—Electrical Resistance of Glass, Quartz, Mica, Ebonite and Gutta-percha; by O. N. ROOD 161

SCIENTIFIC INTELLIGENCE.

Miscellaneous Scientific Intelligence—American Association, 166.

Obituary—DR. CARLO RIVA, 166.

Number 81.

Page

ART. XXI.—Relationship of some American and Old World Birches; by M. L. FERNALD. (With Plates V–VI) ... 167

XXII.—Fertile Fronds of Crossotheca and Myriotheca, and on the Spores of other Carboniferous Ferns, from Mazon Creek, Illinois; by E. H. SELLARDS. (With Plate VII.) 195

XXIII.—Validity of Idiophyllum rotundifolium Lesquereux, a Fossil Plant from the Coal Measures at Mazon Creek, Illinois; by E. H. SELLARDS 203

XXIV.—Precipitation of Ammonium Vanadate by Ammonium Chloride; by F. A. GOOCH and R. D. GILBERT ... 205

XXV.—Additions to the Alunite-Jarosite Group of Minerals; by W. F. HILLEBRAND and S. L. PENFIELD 211

XXVI.—Niagara Limestones of Hamilton County, Indiana: by E. M. KINDLE 221

XXVII.—Velocity and the Structure of the Nucleus; by C. BARUS 225

XXVIII.—Corundum and a Graphitic Essonite from Barkhamsted, Connecticut; by B. K. EMERSON 234

Number 82.

Page

ART. XXIX.—Experimental Investigation into the Existence of Free Ions in Aqueous Solutions of Electrolytes; by J. OLSEN 237

XXX.—Solution of Problems in Crystallography by Means of Graphical Methods, based upon Spherical and Plane Trigonometry; by S. L. PENFIELD 249

XXXI.—Estimation of Bromic Acid by the Direct Action of Arsenious Acid; by F. A. GOOCH and J. C. BLAKE 285

XXXII.—Solubilities of Some Carbon Compounds and Densities of their Solutions; by C. L. SPEYERS 293

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Radio-active Bismuth, MARCKWALD: Thermochemical Constant, F. W. CLARKE, 303.—Heatless Condition of Matter, BRINKWORTH and MARTIN, 304.—Elementary Chemistry, by F. W. CLARKE and L. M. DENNIS: Liquid Hydrogen and Helium, J. DEWAR, 305.—Vapor-pressures of Liquid Oxygen and of Liquid Hydrogen, M. W. TRAVERS, G. SENTER and A. JAQUEROD, 311.

Geology and Mineralogy—Martinique, 312.—Report of the Geological Survey of Louisiana, G. D. HARRIS, A. C. VEATCH and J. PACHECO, 314.—Alpen im Eiszeitalter, A. PENCK and E. BRÜCKNER, 315.—Bacubirito, the Great Meteorite of Sinaloa, Mexico, H. A. WARD: Origin of Eskers, W. O. CROSBY: Ueber Hussakite (Xenotim) und einige andere seltene gesteinsbildende Mineralien, H. RÖSLER, 316.

Miscellaneous Scientific Intelligence—International Catalogue of Scientific Literature, 317.—British Association: Experiments in Aerodynamics, S. P. LANGLEY: Elementary Physical Geography, W. M. DAVIS: International Quarterly, 318.

Obituary—PROFESSOR RUDOLF VIRCHOW.

Number 83.

Page

ART. XXXIII.—Observations on the Eruptions of 1902 of La Soufrière, St. Vincent, and Mt. Pelée, Martinique; by E. O. HOVEY. (With Plate VIII) 319

XXXIV.—Reflection of Electric Waves at the Free End of a Parallel Wire System; by H. A. BUMSTEAD 359

XXXV.—Upper Permian in Western Texas; by G. H. GIRTY 363

XXXVI.—Reduction of Vanadic Acid by the Action of Hydrochloric Acid; by F. A. GOOCH and L. B. STOOKEY 369

JOHN WESLEY POWELL 377

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Combination of Hydrogen and Oxygen, BAKER: Arsenic in the Animal Organism, BERTRAND, 383.—Atomic Weight of Radium, CURIE: Double and Triple Thiocyanites, WELLS, 384.—Determination of Thallium in the Thallous State, THOMAS: Chemisches Praktikum, A. WOLFRUM: Vacuum Thermo Element, P. LEBEDEW: Electromotive Force of Ozone, A. BRAND, 385,—Influence of Electrification of the Air on Electric Sparks, E. LECHER: Reaction between Electrostatic Tubes and Insulators, M. W. DE NICOLAIÉVE: Magnetic Detector for electrical waves, MARCONI: Radiations from Radioactive Substances, RUTHERFORD and BROOKS, 386.—Induced Radioactivity in Air, J. J. THOMSON: Deviable Rays of Radioactive Substances, RUTHERFORD and GRIER: Removal of Negative Electricity from the air by falling drops of water, A. SCHMAUSS: Elements of Experimental Phonetics, E. W. SCRIPTURE, 387.

Geology and Mineralogy — United States Geological Survey, 389.—Iowa Geological Survey, S. CALVIN, 391.—Evolution of the northern part of the Lowlands of Southeastern Missouri, C. F. MARBUT: Geology of the Potomac Group of the Middle Atlantic Slope, W. B. CLARK and A. BIBBINS, 392.—Pleistocene Geology of Western New York, H. L. FAIRCHILD: Michigan Geological Survey, A. C. LANE: Vertebrates of the Mid-Cretaceous of the Northwest Territory, H. F. OSBORN and L. M. LAMBE: Queneau on Size of Grain in Igneous Rocks, A. C. LANE, 393.—Les Roches alcalines caractérisant la Province petrographique k' Ampasindava, A. LACROIX: Ueber mariupolit, ein extremes Glied der Elaeolithsyenite, J. MOROZEWICZ, 396.—Dahamit, ein neues Ganggestein aus der Gefolgschaft des Alkaligranit, A. PELIKAN: Mineral Resources of South Dakota, C. C. O'HARRA and J. E. TODD: Occurrence of Native Arsenic, N. N. EVANS: Inverness Earthquake of September 18th, 1901, and the Carlisle Earthquake of July, 1901, C. DAVISON, 397.

Miscellaneous Scientific Intelligence—Beiträge zur chemischen Physiologie und Pathologie, F. HOFMEISTER: Les Dirigibles, M. H. ANDRÉ: Introduction to Physical Geography, G. K. GILBERT and A. P. BRIGHAM, 398.

Number 84.

Page

ART. XXXVII.—Instance of the Action of the Ice-sheet upon Slender Projecting Rock Masses; by W. H. HOBBS. (With Plate IX) 399

XXXVIII.—New Species Melanochalcite and Keweenawite. With Notes on some other known species; by G. A. KOENIG 404

XXXIX.—Studies in the Cyperaceæ; by T. HOLM 417

XL.—Chemical Composition of Dumortierite; by W. E. FORD 426

XLI.—Characteristics of Kau; by J. S. EMERSON 431

XLII.—Titrimetric Estimation of Nitric Acid; by I. K. PHELPS 440

XLIII.—Clays of the Boston Basin; by R. M. BROWN 445

XLIV.—New Form of Calcite-Sand Crystal; by E. H. BARBOUR and C. A. FISHER 451

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics — Transformation of Carbon into Diamond, A. LUDWIG: Iodometric Titration of Thiocyanic Acid, THIEL, 455.—Iodine Pentafluoride, MOISSAN: Separation of Manganese from Magnesium, Zinc, and Aluminum, DIETRICH and HASSEL: Plasticity and Adhesiveness of Glass at Ordinary Temperatures, PICCARD, 456.—General Principles of Physical Science, A. A. NOYES: Lehrbuch der Allgemeinen Chemie, W. OSTWALD: Spectra of Hydrogen and Reversed Lines in the Spectra of Gases, J. TROWBRIDGE, 457.—New Holtz Machine, H. WOMMELSDORF: Electrical Conductibility of Metals and their Vapors, R. J. STRUTT: Ionization of Nuclei Produced by Violent Agitation of Dilute Solutions, C. BARUS, 559.—Handbuch der Spectroscopie, H. KAYSER, 460.

Geology and Natural History—United States Geological Survey: Geological Survey of Kansas; Special Report on Mineral Waters, E. H. S. BAILEY: Quantitative Chemico-mineralogical Classification and Nomenclature of Igneous Rocks, W. CROSS, J. P. IDDINGS, L. P. PIRSSON and H. S. WASHINGTON, 461.—Petrography and Geology of the Monzoni region in Tyrol, ROMBERG: Gesteinskunde für Techniker, Bergingenieure, etc., F. RINNÉ, 463.—Terlingua Quicksilver Deposits, Brewster County, Texas: Notes on New Minerals, 464. — Gold in Meteorites, LIVERSIDGE, 466. — Triassic Ichthyopterygia from California and Nevada, J. C. MERRIAM, 467.—Zoological Results based on material from New Britain, New Guinea, Loyalty Islands and elsewhere, A. WILLEY, 468.

Miscellaneous Scientific Intelligence—National Academy of Sciences, 468.—American Association for the Advancement of Science: Smithsonian Institution, Annual Report for 1901: United States National Museum: British Museum; Catalogue of the Collection of Birds' Eggs: United States Coast and Geodetic Survey, 469.—United States Naval Observatory: Bureau of American Ethnology: Ostwald's Klassiker der Exakten Wissenschaften: Hodgkins Gold Medal Awarded, 470.

Obituary—DR. OGDEN NICHOLAS ROOD: DR. ROBERT C. KEDZIE: DR. ROBERT RUBENSON: JOHN HALL GLADSTONE, 470.
